

DKH43

Drag Knife Holder

Features

- Precise adjustment of the cutting depth with a 0.01mm accurate scale
- Zero position adjustable via clamping screw in the control knob
- Cutting depth remains precisely set and does not adjust itself
- With exact adjustment only the material to be cut and not the backing material is cut
- Unevenness of up to 10mm in the material is automatically compensated
- Suitable e.g. for Roland plotter knives Ø2x24 mm with cutting angle 30°, 45° and 60°.

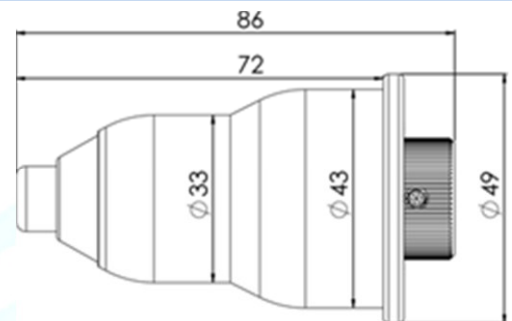

Description

Drag knife holder for use on CNC machines with automatic height adjustment made of high-quality anodized aluminium for cutting paper, thin cardboard, foils, fabrics, etc.

Technical Data

- Knife holder with height adjustment (0.01 mm)
- Suitable for Spindle Holder 33 mm and 43 mm
- Blade holder with double ball bearing
- Magnetic holder (Neodymium Magnet)
- Rotatable down holder made of PTFE with
- good sliding properties

Scope of Delivery

- 1 pcs. Drag Knife Holder, pre-assembled
- 2 pcs. Drag Knives, stainless steel, 45°
- Sturdy practical storage box
- Weight (incl. packing) 246 g
